Summary

Third-year Computer Engineering student at Karabük University, expected graduation 2028. Background in embedded systems, full-stack web development, relational databases, CAD and 3D prototyping. Team captain and engineering contributor in TEKNOFEST UAV and robotics projects, with additional experience in freelance design, IT support and academic assessment.

Skills

Programming: C, C++, Java, Python, PHP, SQL, JavaScript, HTML5, CSS3
Databases: Oracle Database, MySQL, Relational Database Design, SQL Optimization
Embedded & Electronics: ESP32-C3, Arduino IDE, Microcontroller Programming, Circuit Diagnostics, Soldering
CAD & Prototyping: SolidWorks, Cinema 4D, Blender, OrcaSlicer, 3D Printing (PLA, PETG, ASA, PLA-CF)
AI & Vision: YOLOv8, OpenCV, PyTorch, TensorRT
Design: Photoshop, Illustrator, After Effects, Premiere Pro, Figma, CLO Standalone

Experience

Lead Mechanical & CAD Designer In Progress
Project Sentinel — Pan-Tilt Tracking System, Vitality Technologies *TEKNOFEST*
- Lead mechanical and CAD design for pan-tilt assemblies, camera-turret structures, gear-reduction mechanisms and protective enclosures.
- Use SolidWorks and 3D printing for component design, assembly planning and rapid prototyping of a computer-vision tracking system.

Team Captain, Programming & Mechanics Lead — *Artech Team (TEKNOFEST)*
- Contributed to programming and mechanical development of a “Çelik Kubbe” air-defense concept.

CTO & Programming Team Leader — *Greensoft Team (TEKNOFEST)*
- Led the programming team and contributed to educational-platform development and hardware integration.

Freelance Brand & Visual Designer — *Self-Employed* Global / Remote
- Created logos, visual identities and promotional graphics for Al Fakhama Al Maghribya, Tech Team and Prestige Airlines.

IT Technician & Hardware Specialist — *Cips Industry & Independent Business* São Paulo, Brazil
- Performed hardware diagnostics, repairs, component upgrades and custom PC assembly.

IT Department Assistant — *MKM Salgados* São Paulo, Brazil
- Supported network maintenance and routine hardware/software troubleshooting while completing secondary education.

Academic Student Grader, Discrete Mathematics (CPE204) — *Karabük University* Karabük, Türkiye
- Assessed logic and algorithm assignments and coordinated grading with computer engineering faculty.

Projects

Prestige Airlines — Airline Management Platform — *University Project* PHP, MySQL, JavaScript
- Built an airline booking and management system on a normalized MySQL database of 10+ tables, covering reservations, seat availability, ticketing and admin tools.
- Added PDF boarding passes (Dompdf), a post-flight review workflow with booking validation, and a responsive UI with persistent light/dark theme.

Education

Karabük University — B.Sc. Computer Engineering 2024 – 2028 (Expected)
Escola Islâmica Brasileira — Secondary Education, São Paulo, Brazil

Certifications

Oracle Academy — Database Design and Database Programming with SQL
TOTI Institute — Web Development (HTML, CSS, JavaScript)
Software Training — Cinema 4D, Blender, Adobe Creative Suite, CLO Standalone

Leadership & Volunteering

Qatar International Debate Competition — Selected twice to represent Brazil
Palestinian Students Union, Karabük University — Led a student team supporting new students
IHH Humanitarian Relief Foundation — Volunteer in humanitarian assistance initiatives
